StartMail

StartMail Launches Mobile App for iOS and Android

The new app expands access to StartMail's privacy-first email service alongside webmail and IMAP support.

The Hague, Netherlands - **October 22, 2026** - StartMail, the privacy-focused email service, today announced the launch of its mobile app for iOS and Android.

The new app gives StartMail users a dedicated way to manage their private email. Users can now access their StartMail inbox through webmail, their preferred IMAP-compatible email client, or the StartMail mobile app.

With the StartMail app, you can:

1. Read and send private email on mobile
2. Create unlimited aliases to protect your real address
3. Send encrypted messages to anyone
4. Read cached mail without an internet connection
5. Attach photos and files from your phone
6. Preview documents and images in the app

StartMail is designed for people who want email without advertising, tracking, or inbox scanning. Along with PGP encryption, the service offers unlimited email aliases, allowing users to create separate addresses for shopping, newsletters, work, and other online services without exposing their primary email address.

"Many of our customers are tired of being tracked, receiving spam, or living under surveillance by Big Tech or the government. They value StartMail as a means to protect their sensitive data and communicate privately," **said Robert Beens, Founder and CEO at StartMail**. "Privacy needs to be easy. The StartMail app puts your private inbox directly on your phone, with secure, convenient access 24/7. We're excited to make private email more flexible and convenient for our customers."

The StartMail app is available now on the **Apple App Store** and **Google Play**: https://www.startmail.com/download.

About StartMail
StartMail is a Netherlands-based privacy-focused email service that helps users communicate securely and confidentially. StartMail operates completely free of ads, tracking, and inbox scanning for commercial purposes. Powered by built-in PGP encryption and unlimited email aliases, StartMail gives users full control over their personal data and digital communications.
